MOST of the adventures recorded in this book really occurred; one or two were experiences of my own, the rest those of boys who were schoolmates of mine. Huck Finn is drawn from life; Tom Sawyer also, but not from an individual--he is a combination of the characteristics of three boys whom I knew, and therefore belongs to the composite order of architecture.

The odd superstitions touched upon were all prevalent among children and slaves in the West at the period of this story--that is to say, thirty or forty years ago.

Although my book is intended mainly for the entertainment of boys and girls, I hope it will not be shunned by men and women on that account, for part of my plan has been to try to pleasantly remind adults of what they once were themselves, and of how they felt and thought and talked, and what queer enterprises they sometimes engaged in.

and thought and talked, and what queer enterprises they sometimes engaged in

and thought and talked, and what queer enterprises they sometimes engaged in.

		Hello Gopher!

Diagram illustrating the evolution of a sentence structure through various transformations, showing the relationship between text, HTML code, and calculated dimensions.

Initial State (Left):

- Text: Hello Gopher!
- HTML Code: `hello Gopher! width=125;`
- Relative Width: $\text{Relative Width}=30\%$

Transformations (Middle):

- Text: Hello Gopher! Hello Gopher! Hello Gopher!
- HTML Code: `hello Gopher! width=125; rel="He" relative="Relative" width=125;`
- Relative Width: $\text{Relative Width}=30\%$

Final State (Right):

- Text: Hello Gopher! Hello Gopher! Hello Gopher!
- HTML Code: `hello Gopher! width=125; rel="He" relative="Relative" width=125; height=125;`
- Relative Width: $\text{Relative Width}=30\%$
- Relative Height: $\text{Relative Height}=30\%$

Additional Content (Bottom):

- Text: Hello Gopher! Hello Gopher! Hello Gopher!
- HTML Code: `hello Gopher! width=125; rel="He" relative="Relative" width=125; height=125; justified="Justified" width=125;`
- Relative Width: $\text{Relative Width}=30\%$
- Relative Height: $\text{Relative Height}=30\%$
- Justified Width: $\text{Justified Width}=130$

Diagram illustrating relative widths in a flex container:

- Yellow box: `Hello Gopher!` (Relative Width=30%)
- White box: `Hello Gopher!` (Relative Width=10%)
- White box: `er!` (Relative Width=20%)

Diagram illustrating the effect of relative width on the size of the content area. The text "Hello Gopher!" is displayed inside a box. The box is labeled "Relative Width=20%". The box is shown in two states: a larger state (top) and a smaller state (bottom), demonstrating how the relative width affects the overall size of the box and its content.

Diagram illustrating relative width percentages:

- Top rectangle: Hello Gopher! Relative Width=100%
- Bottom-left rectangle: Hello Relative Width=100%
- Bottom-right rectangle: Hello Gopher! Relative Width=10%
